

The Kocan family must stay!

13 years ago the Kocan family fled to Germany from war in Kosovo. Now they will be pushed off to go back to Kosovo, while their 5 children (between 18 and 26 years old) may remain in Germany. But now their parents will be dumped off to Kosovo again even though brutality and terror still belongs to everyday life 6 years after the official end of the war. The family belongs to the Bosnian minority in Kosovo and will expect to live in a "Ghetto" or even experience fatal, racist assaults. In addition, Mr. Kocan suffers from diabetes and necessary medical treatment of this disease is not guaranteed after his deportation.

We will not accept that a family that already had to leave behind everything its home country now will be separated.

Please sign for a determined "No".

The signatures will be handed to the responsible places in the ministry!

No deportation of the Mr and Mrs Kocan

[illegible]
